Art Unit: 2154

1. Claims 1,3-5,7-9,11,13,15,16,18-22 and 24-35 are presented for examination.
2. The rejection under 35 USC 101 is withdrawn in view of the amendment filed 05/05/2006.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1,3-5,7-9,11,13,15,16,18-22 and 24-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

5. Applicant specification set forth high level examples of the desired end results and label for which the elements the claims are to be referenced as, applicant has left it to other to supply the underlying glue by which the System requires to operate. Therefore applicant has failed to supply a disclosure by which one of ordinary skill in the art can make or use the invention.

Example claim 1, "permitting direct automation of real world functions without the prior systemization of the real world functions," this passage is enabled in the specification with numerous paraphrasing of the statement.

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1,3-5,7-9,11,13,15,16,18-22 and 24-35 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by the documentation of REOHR (submitted 05/05/2006, with a copyright date of 01/03/1997).
8. Applicant's arguments filed 05/05/2006 have been fully considered but they are not persuasive.
9. In response to the arguments direct to the 112 1<sup>st</sup> rejection.

Art Unit: 2154

10. Applicant disclosure set forth that the invention is a new computer paradigm, and the art submitted 05/05/2006, indicates the project is over 20 years in development. The detail in the disclosure is insufficient to provide the detail necessary to make or use the invention without undue experimentation.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
